

MANNOL Auto Wash & Wax ASW 9809

Auto Wash & Wax ASW-super shampoo concentrate with the highest washing and cleaning action for manual contact washing of cars and other vehicles with the properties of polish.

Properties:

- A special mixture of active substances-foaming agents creates very active foam and thoroughly cleans the car;
- Active detergents effectively remove all types of stains and dirt: dust, fuel, oil, fat, soot, insect residues, etc. due to their excellent splitting properties;
- Due to the contained wax components, it forms a strong and transparent film that protects the body after washing and gives it an excellent long-lasting shine;
- Easily washed off with water without leaving stains, streaks, smudges and other traces;
- It is recommended to dissolve in hot water.

Compatibility: safe for paint and varnish surfaces, plastics and rubber-technical products.

Application:

In advance remove large dirt with a strong stream of water.

To prepare the working solution, the concentrate must be diluted with hot water in a ratio from 1:100 (100 ml per 10 liters of water) to 1:20, depending on the degree of soiling. Apply the solution with a sponge to the surface of the car body. Leave for 5-10 minutes to act. RUB the car body with calm movements without pressure. Wash the surface thoroughly with clean water. the pH of the solution in a ratio of 1: 100 (20 °C) is 7-8.
